

1 **ABSTRACT OF THE DISCLOSURE**

2 A support stand assembly for a computer desk has a base (12), a
3 column (11) detachably mounted on the base (12), and a headphone mount
4 (10) attached to the column (11). The base (12) has a top face and multiple
5 margin flanges (125) formed on the top face to define an enclosure (122) for
6 placing a computer mouse, and multiple threaded holes defined in the top
7 face to selectively engage with pillars to attach multiple fittings to the base
8 (12). Thereby, the support stand assembly enables the arrangement of the
9 headphone, the mouse device and other accessories on the support stand
10 assembly in order to keep the computer desk neat.
